

## APPLICATION

GreenSafe™/Purely Green  
Cannabis Cultivation

### Indoor Growing

GreenSafe™ Plant Amendment (Indoor)

Apply 4 ml per gallon of water with or without fertilizer. Use daily from cloning to harvest in any medium and hydroponics. Subtract 33% base feed when applying in hydroponics systems with inorganic nutrients only.

GreenSafe™ Foliar Spray (Indoor): 15ml per gallon of water with or without fertilizer.

### Outdoor Growing

GreenSafe™ Plant Amendment (Outdoor): Spray soil diluted with at least 20 gallons of water or agrichemical solution. Apply 5 ounces per acre at final disc. Then apply 3 more times at even intervals stopping 1-week before harvest. Drip irrigation application is 1 ounce per 300 gallons of water with or without fertilizer every week of the growing cycle.

GreenSafe™ Foliar Spray (Outdoor): Spray plants once per week stopping one week before harvest. Apply with a spray application once per week for the entire growing season.

### All Growing

Purely Green Bio-Pesticide Super Concentrate: Spray or drench soil and spray plants with 3-oz per gallon of water. (See Added Applications Below)

GreenSafe All-Purpose Cleaner Concentrate: GreenSafe/Purely Green products clean and keep surfaces, lines and sprays clean. Clean with All-Purpose cleaner without harsh chemical residuals and handling risks with 3-oz. per quart of tap water. For spotless glass cleaning use 1-oz. per quart of sprayer solution. (For applications requiring FDA or EPA certified products, follow CDC recommendation to deep clean surfaces prior to a final application of the certified product – where 100% organic chemicals are needed, use an organic alcohol for the final step.)

### Mixing

Fill container halfway with tap water prior to adding:

+	All-Purpose Cleaner	3-oz./qt.
+	All-Purpose Cleaner-Degreaser	3-oz./qt.
+	Bio-Pesticide Super Concentrate	3-oz./gal.
+	Plant Amendment (Indoor)	4-ml/gal. Irrigation Water (0.14 oz./gk.)
+	Foliar Spray Conc. (Indoor)	15-ml/gal. (0.5-oz./gal.)
+	Plant Amendment Conc. (Outdoor)	5-oz./acre – 20gal. water
+	Foliar Spray Conc. (Outdoor)	5-oz./acre – 20gal. water

3	6	
4	8	1/2

Fill container to complete mixing with minimum foaming.

### Bio-Pesticide Added Applications

Farm & Garden: Dilute 3 fl. oz. per 1 quart of water. Foliar Spray: Thoroughly spray top and bottom of leaves, limbs and stem until all foliage is wet. Soil Drench: Spray soil until wet. For Nematodes and Root Fungus: Soak the soil and roots well enough to reach the targets. Repeat quickly after eggs hatch.

Trees (Fruit, Nut & Berry): Best results on mature plants & trees, dilute 3 fl. oz. to 1 quart of clean water, spray leaves, trunks, and soil until drenched. For application on young seedlings, dilute 2 fl. oz. of product to 1 quart of clean water and apply as foliar and soil drench every 2-4 weeks or whenever insects or pests are present.

Residential, Commercial and Agricultural Buildings: Dilute the product at 1- 2 fl. oz. per quart of water and spray, brush, or hose down areas to be cleaned. Rinse with water after cleaning to ensure a clean surface.

Household Pets and Livestock: Dilute the product at 1- 2 fl. oz. per quart of clean water. Product can be left to dry on animals or rinsed with clean water.

### Notes

1. Plant Amendment and Foliar Spray can be mixed with agrichemicals for a single application. Jar testing is recommended to assure compatibility.
2. Bio-Pesticide Not available in Alaska, Alabama, Connecticut, Illinois, Louisiana, Maryland, Maine, Mississippi, New Mexico plus Canada.
